

Privacy Policy

Bible Answers | Beta Edition · v0.1.0 | Last updated: September 5, 2026

Bible Answers is a free, open-source Beta application designed to help people discover relevant passages from the Bible based on questions, feelings, or situations they share.

We respect your privacy and aim to collect only the information reasonably necessary to operate, understand, and improve the service.

1. Information You Provide

When you use Bible Answers, you may enter a question, feeling, situation, or other text into the application.

This information is used to generate a response and identify relevant Scripture.

Bible Answers does not store the text you enter in its first-party analytics database.

However, your input may be transmitted to third-party services used to provide the application's AI functionality, as described below.

Please avoid entering passwords, financial information, government identification numbers, or other highly sensitive personal information into Bible Answers.

2. Anonymous Usage Analytics

Bible Answers uses a small, first-party analytics system to understand how the application is being used and to improve the service.

Analytics may record:

- An anonymous session identifier
- General device type, such as mobile, tablet, or desktop
- The type of interaction performed
- Detected response category
- Scripture reference returned by the application
- Response time
- Feedback voluntarily submitted by the user
- Donate button interactions
- Date and time of the event

We do not intentionally store the user's original emotional or personal text in our first-party analytics database.

We also do not use GPS or precise location information for analytics.

3. Session Identifiers

Bible Answers generates a random, anonymous session identifier to group related interactions during a session.

This identifier is not intended to identify you personally.

4. Third-Party AI Services

To generate responses, Bible Answers may send your submitted text to third-party AI and machine-learning services used by the application.

These services may include:

- Groq, for language-model processing
- Hugging Face, for hosted semantic-embedding functionality

Your submitted text therefore may be processed by these providers in order for Bible Answers to function.

We recommend reviewing the privacy policies and terms of the relevant third-party providers before using the service.

5. Scripture Data

Bible Answers uses a public-domain English Bible translation as its Scripture source.

The application does not claim ownership of public-domain Scripture text.

Additional information about the translation and its source is provided on the Scripture Source page.

6. Feedback

If you voluntarily contact us by email or provide feedback, we may receive your email address and the information contained in your message.

This information may be used to:

- Respond to your message
- Investigate problems
- Improve Bible Answers
- Understand user suggestions and feedback

We do not sell your feedback information.

7. Donations

Bible Answers currently does not process donations directly.

The Donate feature is intended to encourage users to consider donating ₹1 to a nearby church.

Bible Answers does not currently collect payment information through this feature.

8. Cookies and Tracking

Bible Answers is designed to use minimal tracking.

The application does not intentionally use advertising trackers or third-party advertising cookies.

Anonymous first-party analytics are used to understand application usage.

9. Data Security

We take reasonable steps to protect information handled by Bible Answers.

However, no internet service can guarantee absolute security.

Because Bible Answers is an open-source Beta project, the application may evolve over time as security, infrastructure, and functionality are improved.

10. Data Retention

Analytics data may be retained for as long as reasonably necessary to understand usage, maintain the service, investigate issues, and improve Bible Answers.

We may periodically remove or anonymize older analytics data.

11. Children's Privacy

Bible Answers is not specifically designed to collect information from children.

We do not intentionally request personal information from children.

Users should avoid submitting personal or sensitive information into the application regardless of age.

12. Open Source

Bible Answers is an open-source project. Its source code may be publicly available so that others can inspect, learn from, reproduce, and contribute to the project.

Publicly available source code does not include private credentials, API keys, or other secrets intentionally kept outside the repository.

13. Changes to This Privacy Policy

This Privacy Policy may be updated as Bible Answers evolves from Beta to later versions.

When significant changes are made, the Last updated date at the top of this page will be revised.

14. Contact

If you have questions, concerns, suggestions, or Beta feedback regarding Bible Answers, you can contact:

Karthi Balasundaram

Beta Feedback: YOUR_EMAIL@example.com

15. Important Notice

Bible Answers is an AI-assisted Scripture discovery and reflection tool.

Its responses are generated with the assistance of artificial intelligence and should not be treated as authoritative theological, medical, legal, financial, or mental-health advice.

For matters requiring professional or pastoral guidance, users should consult an appropriately qualified person.

Template note This document uses the Bible Answers visual theme and can serve as the formatting template for future Privacy, Terms, Scripture Source, and project documents.
